Subject: Sterigenics Santa Teresa

Liz,

FYI....as a follow-up commitment to the OIG based on their March 2020 report and them identifying Sterigenics having an estimated risk above 100 in 1 million, and our commitment to do outreach.....we still may have to do community outreach in the Santa Teresa area. We believe the estimated risk right now is less than 100 in 1 million with the addition of controls, but appears we will still need to complete our follow-up on the OIG report. I just wanted to let you know in case Secretary Kenney has questions. Please call me if you have questions or want to discuss possible NMED participation. Thanks.

Jeff
